US Customs and Border Protection officers in the park's cargo lot in the early morning noticed a group of teens and an adult male "were either playing or sleeping on a large container with the door open," Hawaii News Now reported, citing Customs and Border Protection. After a passerby spotted the teen inside the container, which smelled of urine, CBP officers, Honolulu Police, and Fire Department personnel conducted a rescue. Officials brought the girl to the hospital after she was exposed to heat. A witness said the group was from the US mainland. A CBP spokeswoman said in a statement that the woman was in good health and declined medical attention, but would be referred to a law enforcement agency. The child was being cared for by Children's Action Corps. Officials released video footage of the incident on social media on Tuesday. GORDON WOODS CONFIRMS PENIS, WILLIAMS EMMER GLOVE SHOWS 'SURPRISE' COVERAGE "We are taking this matter very seriously," the CBP statement read. "We conducted a thorough investigation at our processing facility and learned a storage container was left unlocked and unattended. We are currently conducting a full investigation and will take any necessary actions

Winabler Portable [Updated]

Winabler is a fully customizable mouse right-click menu manager for Windows, with many of them included out of the box and the ability to add new ones using simple.INI files. Winabler loads into the system tray as a special icon without having any installed dependencies or asking for system information, as all the data is collected from the currently running process. No additional setting windows are opened or required. This means that Winabler allows you to quickly view and modify right-click menus for executables, DLLs, EXEs, BAT scripts and other files. Winabler is developed from scratch, is 100% customizable and includes all the tools for viewing/modifying right-click menus. Key Features: - User-friendly design - Flexible menu editing - Access to.INI files for adding menus - System tray - Compatibility with most Windows systems - No additional software is required - Default of right-clicking in the image area Is it possible to limit the memory used by a program? A: You could check out limit (or a similar program) It's an easy to use program that can limit what memory a process can use. Limit is very fast because it uses a special, lightweight method that lets the OS decide how much memory a process is allowed to use. and: The program uses the system resources better to save memory, which means it will run faster. Polybrominated diphenyl ether (PBDE) exposure and subclinical thyroid dysfunction in pregnant women. A few studies have investigated the association between polybrominated diphenyl ether (PBDE) exposure and thyroid dysfunction in pregnant women, but the results were inconsistent. We conducted a cohort study to evaluate the relationship between maternal PBDE exposure and subclinical thyroid dysfunction in the third trimester. The study included 513 pregnant women from Northern Europe, who were exposed to PBDEs and had TSH measured and thyroid peroxidase (TPO)-specific antibodies. In multi-pollutant analyses, PBDEs were significantly correlated with TSH (Spearman's r = 0.19), free T4 (FT4) (r = -0.13) and TPO antibodies (r = 0.21). The prevalence of abnormal TSH concentration increased significantly with increasing concentrations of maternal PBDEs (interaction 09e8f5149f

Windows tool for temporarily enabling disabled objects. Capture active windows to enable objects. Drag a crosshair to unlock objects. Evaluation: Developer(s): - Price: free Size: 102.39 MB What is it about? Designed as the portable edition of Winabler, Winabler Portable is an advanced and easy-to-use application that can temporarily enable disabled objects in various Windows tools, thus giving you the possibility to test them even if they are locked under normal circumstances. Portable tool with a simple UI Since there is no installation involved, you can copy the downloaded.exe file to a custom location on the disk and double-click it to launch the program. It can also be stored on a USB flash drive to carry it with you at all times and run it on any machine. As far as the interface is concerned, there's a single window available, which shows all options provided by Winabler Portable. Capture active windows to enable objects To give control to the app, you can capture the menu structure from a currently running program, in order to test the menu options in this area instead of the source. Worth mentioning is that the application's not compatible with all types of windows out there, as they must meet a certain standard (e.g. graphical menus, which are in fact button bars). Captured menus can be released. Drag a crosshair to unlock objects A crosshair symbol can be dragged out of the utility and moved to the disabled object you're attempting to unlock. If the item doesn't seem to become enabled, you can target its parent object instead. As informed by the developer, some objects continuously disable themselves, so it's necessary to keep unlocking them. Evaluation and conclusion It left a small footprint on system resources in our tests, thanks to the fact that it needed a low amount of CPU and RAM to function normally. No error dialogs popped up and it didn't hang or crash. To sum it up, Winabler Portable may come in handy for disabling locked objects from other running programs, as long as you keep in mind that it doesn't work with all types of windows. Pro LockBox is a tool to lock and unlock computer files, programs and the entire system. Whether it's for security or convenience, it's an essential solution for all computer owners. It comes with
